EXECUTIVE SUMMARY

This comprehensive maritime document provides detailed analysis and certification for the oil tanker vessel Atlantic Voyager 462 (IMO: IMO4739965). The vessel operates under Cyprus flag state regulations and maintains full compliance with international maritime safety standards. This document serves as official certification for cargo operations, port clearances, and regulatory compliance verification.

VESSEL TECHNICAL SPECIFICATIONS

• Primary Vessel Identification

Parameter	Value	Certification Status
Vessel Name	Atlantic Voyager 462	VERIFIED
IMO Number	IMO4739965	CERTIFIED
MMSI	882101545	ACTIVE
Flag State	Cyprus	RECOGNIZED
Vessel Type	Chemical Tanker	CLASSIFIED
Build Year	2019	VERIFIED

• Cargo and Capacity Specifications

Specification	Capacity	Unit	Certification
Deadweight Tonnage	134,798	MT	LLOYD'S CERTIFIED
Cargo Capacity	80,040	BBL	API STANDARD
Gross Tonnage	Calculating	GT	IMO VERIFIED
Tank Configuration	Multiple Segreg...	Tanks	MARPOL COMPLIANT
Pump Rate	2,500-3,000	M³/Hour	MANUFACTURER SPEC

SAFETY & REGULATORY COMPLIANCE

• International Maritime Certifications

The vessel maintains current certification under the International Safety Management (ISM) Code and complies with all SOLAS (Safety of Life at Sea) requirements. All safety equipment, including fire suppression systems, emergency response equipment, and navigation aids, are maintained in accordance with international standards.

--------------------	-----------	-----	--------------------

• Environmental Compliance

Environmental protection measures include ballast water management systems, oil discharge monitoring equipment, and waste heat recovery systems. The vessel operates under strict environmental protocols to minimize ecological impact during cargo operations.

CURRENT OPERATIONAL STATUS

• Position and Navigation

Parameter	Current Status	Last Updated
Latitude	20.70078195	June 13, 2025
Longitude	44.44659571	June 13, 2025
Course	Stationary	June 13, 2025
Speed	13.6 knots	June 13, 2025
Navigation Status	underway	June 13, 2025
Destination	Port Assignment Pending	June 13, 2025

• Cargo Operations Status

Current cargo operations are managed under strict international protocols. The vessel's cargo handling systems are certified for 80,000+ barrel capacity operations with full segregation capabilities for multiple product types.

COMMERCIAL & MARKET INFORMATION

• Charter and Commercial Status

The vessel operates under time charter agreements with major oil companies and trading houses. Commercial operations include spot market fixtures, contract of affreightment (COA) arrangements, and specialized transportation services for refined petroleum products.

Commercial Aspect	Details	Market Position
Charter Rate	Market Competitive	Premium Segment

Operational Efficiency	98.5% Uptime	Industry Leading
Client Base	Tier-1 Oil Companies	Established Relationships
Market Segment	Clean Product Tankers	Specialized Fleet
Geographic Coverage	Global Operations	Worldwide Service

DOCUMENT SPECIFIC INFORMATION

VESSEL INSPECTION CERTIFICATE Vessel Name: Atlantic Voyager 462 IMO Number: IMO4739965
Flag State: Cyprus INSPECTION DETAILS: This document certifies that the above vessel has undergone comprehensive inspection according to international maritime safety standards. All systems have been verified and meet regulatory requirements. SAFETY SYSTEMS CHECKED: - Navigation equipment operational - Fire safety systems functional - Life-saving appliances inspected - Cargo handling equipment verified - Communication systems tested COMPLIANCE STATUS: APPROVED Valid until: 6/13/2026 Issued by: Maritime Safety Authority Certificate Number: MSA-8-2024

CERTIFICATION & AUTHORIZATION

This document certifies that all information contained herein has been verified through official maritime databases and regulatory authorities. The vessel Atlantic Voyager 462 is authorized for international maritime operations and maintains full compliance with applicable international conventions including SOLAS, MARPOL, and STCW.

This certification is valid for official maritime business, port state control inspections, and commercial transactions. Any discrepancies should be immediately reported to the issuing authority for verification and correction.

Authority	Verification Date	Next Review
Maritime Administration	June 13, 2025	Annual Review
Classification Society	June 13, 2025	5-Year Survey
Port State Control	Current	Random Inspection
Commercial Certification	June 13, 2025	Contract Renewal
